

*Print Resources for Job Seekers and Career Changers
at the Silas Bronson Library*

The aim of this document is to introduce you to the wide variety of print resources available at the Silas Bronson Library that can help with your job or career-related research. Electronic resources are also extremely helpful, but rather than list them here, we will tell you how to get to them: begin at the Library home page, <http://www.bronsonlibrary.org>. On the left navigation bar, position the mouse over “Internet Searching” and, from the pop-up menu, click “Research.” Click “Employment.”

Researching an Industry

Handbook of U.S. Labor Statistics: employment, earnings, prices, productivity

How'd You Score That Gig?

By Alexandra Levit 640.14 lev 2008

Can you see yourself in that job? This book consists of interviews the author conducted with people about their jobs and how they got started in their respective fields. Don't overlook the off-beat when thinking of possible careers. Here, you can read about people who sound happy as pet-sitters, outdoor adventure guides, boutique owners, and inventors. Similar title: Cool Careers for Dummies.

The Career Chronicles: an insider's guide to what jobs are really like

By Michael Gregory 331.702 gre (2008)

The focus of this book is to get past stereotypes. The author interviewed people in different fields to find out what the average day is like for each and what they like best (or least) about their work.

You will also find many books throughout the nonfiction collection that analyze various types of careers, for example: careers for those who like to work with animals, careers in the health field. Search for these in the card catalog. We have books about doing a job search, writing a resume or cover letter, and interviewing in the 650's.
