## BUSINESS NOTICES.

— o —

THE SCOVILL MANUFACTURING COMPANY'S works are on Mill street, at the foot of Cole, and are very extensive. Their button business was begun here in 1802. The present corporation dates from 1850. They employ about 400 hands. They manufacture rolled sheet brass and German silver; also metal close plated with gold, silver or platina, which excels anything made in this country. They also electroplate with gold, silver and nickel. They are the oldest gilt button makers in the country and make an immense variety of military, gilt and covered buttons. They also make wrought brass butt hinges, piano hinges, coal oil burners, lamps, thimbles, ferules, copper funnels and a great variety of small brass goods.

At their New York establishment, 419 and 421 Broome street, they deal extensively in all kinds of photographic material. They also have a house in Boston and an agency in Chicago.

HOLMES, BOOTH & HAYDENS, established in 1853, have a large rolling-mill and other factories situated near the Naugatuck railroad. A large capital is invested, the works are very extensive, and several hundred hands employed. Steam power is exclusively used; the largest engine being of 400-horse power. They make sheet brass, copper, German silver, gilding, platers' and gold metal, plain and fancy wire and rods, of brass, copper and German silver. Tubing of plain, fancy and extra patterns, from German silver, brass, copper and zinc. Copper and brass rivets and burs, all varieties. They manufacture kerosene lamp burners in great variety and large quantity. In this branch the concern is one of the

first in the business. In this department are made shade rings, globe holders, brass hand lamps, gas fixture trimmings, jack chain and other goods of this description

In the manufacture of silver plated ware, the concern has engaged largely, and has established an excellent reputation, having been awarded a first premium medal and diploma for first quality at a recent exhibition, by the American Institute, New York. They make their own nickel silver. A. S. Chase is president, and James M. Abbott, secretary.

BLAKE & JOHNSON is the name of a thriving corporation, manufacturers of special machinery. Hardened cast-steel rolls, plain or engraved, are prominent among their products, which also embrace ladies' hair-pins, rivets, etc, etc.

BROWN BROTHERS, whose warehouse is at 81 Chambers street, New York, are keeping 250 men busy in the production of brass, in the shape of rivets, wires, etc. Brass and copper kettles are a specialty here. They have been established 21 years, and their rolling-mill is a model of convenience and architectural design. Their capacity is 2,250,000 pounds of brass per year in ordinarily good business times.

THE AMERICAN PIN COMPANY are now employing 90 hands, and well may one inquire, "Where do all the pins go?" for this establishment turns out 16,500 papers of pins per day. They are running seventy machines of their own design, and are full of orders. Mr. Driggs remains in the agent's chair, and Mr. Irving H. Coe is his gentlemanly clerk.

THE CARRINGTON MANUFACTURING COMPANY, engaged in the manufacture of sadlery and carriage hardware, brass castings and corset steels, employ now 120 hands.

THE FARRELL FOUNDRY AND MACHINE COMPANY, make at Waterbury and Ansonia all classes of rolling-mill machinery, of which chilled rolls are a special item. Rubber machines, heavy gearing, presses and the various parts necessary to mill equipment, are among their more prominent products, on which 200 hands are engaged.

THE WATERBURY BRASS COMPANY, of which J. S. Elton is president and treasurer, and whose main warehouse is 52 Beekman street, New York, is one of the largest concerns in its line in this country. To particularize its productions would be to devote an entire paper to details, each interesting to the general reader. Rolled brass of all descriptions and its assumption of different shapes, tubes, rivets, bars and sheets, constitute the specialty of their wares, in making which they employ 400 hands. One of their mills is 100 feet square, with wings 100 feet by 35. The other mill is 75 feet by 125, and an adjoining wing 80 by 60. This corporation was established in 1845, and united with, or rather absorbed the American Flask and Cap Company, who are the largest manufacturers in the United States of percussion caps, powder flasks, shot pouches and other sporting goods, and also manufacture on a large scale eyelets, shirt trimmings, measuring tapes and small brass goods of every description. This factory is 45 feet by 200, with a wing 40 by 120 feet.

THE WATERBURY BUCKLE COMPANY make every variety of vest, pantaloons, suspender, shoe, belt and skirt buckles and general brass trimmings. They have been in the business 18 years.

THE WATERBURY CLOCK COMPANY was organized as a joint-stock corporation in March, 1857. Since that time their business has gradually increased to the present time. They manufacture at their factories, located at Waterbury, a large variety of clocks and regulators. The salesrooms of the Co. are at No. 4 Cortlandt street, New York, and 160 Clark St., Chicago, where they keep a large assortment of clocks, of both domestic and foreign manufacture. The officers are, Charles Benedict, president; H. L. Wade, secretary; M. Bailey, treasurer.

UNITED STATES BUTTON COMPANY, North Main street, established 1837, capital \$100,000, manufacture brass goods in great variety, such as screws, nuts, washers, chains, skirt slides, buttons, or any article made from brass.

## WATERBURY CITY GOVERNMENT.
